### Additional information

This form must be completed in full before being accepted by Evoenergy. Permanent supplies will not be actioned from temporary supply applications (a second application form must be submitted for the permanent supply). Completed forms are to be submitted by mail, email or in person.

Where applicable detailed maximum demand calculations must include the following details. (Note: withholding this information may result in delays in responding to this request.)

Type of development (office, warehouse, industrial etc.).	Information on load management system (if applicable).	Any seasonal factors, i.e. seasonal variation of load.
Timing of the development. If the development is to proceed in stages, the timing for all stages.	Duty cycle of any large equipment or duty cycle of an industrial process.	Main factors affecting level of demand.
Net useable floor area, gross floor areas and their proposed usage.	Details of any substantial intermittent and fluctuating loads.	Removal of any part of an existing installation.
Type of heating and cooling (gas, electric, etc.).	Details of any large single phase loads.	Any planned future augmentations or upgrades.
A list of the load components of the proposed installation with their maximum demands, diversity factors, etc.	Details of any loads likely to cause substantial harmonics.	Any on site emergency backup arrangements.
	Details of any loads which are likely to have poor power factors.	Details of large starting motors and voltage drop limitations.
